

#### Government-Backed and Proven

- Developed by U.S. Department of Defense for mission-critical operations
- Maintained and supported by government TAK Product Center ([www.tak.gov](http://www.tak.gov))
- Free civilian version - no annual licensing fees

#### Massive User Base (380,000+ Users)

- FBI and Secret Service use it daily
- Texas Department of Public Safety
- Police & Fire departments nationwide
- Disaster relief organizations during major emergencies

#### Instant State/Federal Coordination

- Automatic compatibility with state emergency management platform using server level (API) connections
- Direct connection to numerous response agencies when needed
- No special setup required - works immediately with other TAK users

It's free, proven, and connects you instantly to professional emergency response networks.

Most importantly: It works on the phones and tablets your staff already carry.

### Instant Visual Coordination

- Everyone sees the same live map - campus security, police, EMTs, administrators
- No more confusion about "which building" or "where exactly"
- Real-time updates appear instantly on all devices

### Uses Your Existing Devices

- Works on any smartphone or tablet you already own
- No expensive specialized equipment required
- Staff already know how to use phones and tablets

### Eliminates Communication Chaos

- Replaces scattered radio chatter with organized digital updates
- Reduces 911 call overload during mass casualty events
- Secure messaging that can't be intercepted

**TAK connects to what you already have!**
