

FLY AWAY COMMUNICATIONS KIT (FACK)

This kit contains; five fully provisioned and secure ATAK End User Devices (EUD), commercial cellular capability , two layers of data encryption to safely use commercial LTE, GoTenna radios for local redundant communications, and satellite availability. Lasting power is provided by a lightweight portable solar generator and battery. This kit comes fully provisioned to connect to a user's TAK network of choice. If a user does not specify an initial TAK network connection, all kits will be delivered with a live connection to a test server for set up and initial training. Package comes in a hardened case with a tactical phone case, phone charger and a battery pack.

Options Include:

- **Starlink or Starshield satellite**
- **AT&T First Net (For eligible buyers) or Unlocked for cellular plan of own choosing**
- **Tactical or Non-tactical Phone**
